

# STUDRAM

## PELLETS

### COMPOSITION

Nutrient	g/kg
Crude Protein (min.)	145
Equiv. Crude Protein from NPN (max.)	15.55 %
Urea (max.)	5
Moisture (max.)	120
Crude Fat (min.)	25
Crude Fat (max.)	70
Crude Fibre (min.)	110
Crude Fibre (max.)	120
Calcium (min.)	3.5
Calcium (max.)	5
Phosphorus (min.)	2.5
Ca:P Ratio	1.4-2.0:1
Magnesium (min.)	2.3
Sulphur (min.)	2.3
Potassium (min.)	9.5
Iron (min.)	57 mg/kg
Copper (min.)	13 mg/kg
Manganese (min.)	35 mg/kg
Zinc (min.)	50 mg/kg
Cobalt (min.)	0.23 mg/kg
Iodine (min.)	0.28 mg/kg
Selenium (min.)	0.18 mg/kg

### FEEDING RECOMMENDATIONS

- Adapt rams to the feed over a period of 10 days.
- Keep troughs filled and prevent gluttonous eating by hungry animals.
- A constant daily intake can help to prevent rumen digestive problems.
- Clean fresh water must always be available to the animals.
- Store in a cool, dry place, away from direct sunlight.

**Form: Pellets**

**Packaging: 40 kg Bags**

## Feed for growth and development of rams

- Supplement for growing rams.
- Contains stock remedies for the prevention of kidney and bladder stones.
- Effective where pastures do not meet the nutritional requirements of animals.
- Suitable for rams in a poor condition as well as preparation of show animals.
- Quality raw materials are used to increase feed intake and to ensure maximum performance.

### FEEDING INSTRUCTIONS

1. Protect the feed from rain. NPN (e.g. urea) is soluble and animals drinking such a solution could be poisoned.
2. This farm feed must not be fed indiscriminately together with other NPN-containing feeds. Consult an AFGRI Animal Feeds Technical Advisor for recommendations.
3. Vinegar is an effective remedy against NPN poisoning. Treatment: Mix with an equal amount of water and dose half a bottle per calf or large sheep and 2 to 4 bottles per head of cattle (1 bottle = 750ml).
4. Guidelines for intake: Intake will depend on the age, condition and required growth rate as well as the quantity and quality of roughage.

### RECOMMENDED INTAKE

An adaptation period of 10 days is very important

Day 1-3	Feed pellets at 1.5% of the ram's body weight per day plus <i>ad lib</i> good quality roughage
Day 4-6	Feed pellets at 2.25% of the ram's body weight per day plus <i>ad lib</i> good quality roughage
Day 7-10	Feed pellets at 3.0% of the ram's body weight per day plus <i>ad lib</i> good quality roughage

After adaptation, feed Stud Ram Pellets *ad lib*. If the animals have adapted well, no additional roughage will be required after the adaptation period.

### WARNING

This farm feed contains a NPN source and registered stock remedies. Feed strictly according to instructions. For stock remedy recommendations see attached labels.
