

# CHICKGROWER

**P1471**

## Grower feed for growing pullets

- Meets the nutritional requirements of growing pullets from 6 weeks of age until point of lay (17 weeks old).
- Highly digestible protein to optimise body frame development.
- Hen's body weight development is maximised for future egg production.
- Feed is highly palatable to encourage feed intake and growth.

### Composition

Nutrient	Specification <sup>1,2</sup>	Min/Max
Protein	150	Min
Lysine	6	Min
Fat	25	Min
Fibre	70	Max
Calcium	7 – 15	Min to Max
Phosphorous	6	Min

#### TEXTURE AND PACKAGING:

Texture: Mash

Packaging: 10kg and 40kg bags

### Animal Group:

Layers

### Class:

Chick Grower Feed

### Objective:

Chick Grower is developed to meet the nutritional requirements of pullets from approximately 6 – 8 weeks until 17 weeks (Point of Lay).

### Feeding Instructions:

1. Feed *ad libitum* from approximately 6 weeks of age (at least 500g pullet) until 17 weeks of age.
2. Fresh feed and water must be available at all times.
3. To ensure optimum growth there should be sufficient feeder space per bird.
4. Feeders must always be kept clean.

### General:

- The basis for switching between diet types is the hens' body weight development.
- Chicks should remain on Starter feed if target weight of 500g is not achieved at 6 weeks.
- Contains at least 5% genetically modified organisms.
