

OPTILAY

60

P1329

Laying mash for hens from 60 weeks of age until depletion

- Meets the nutritional requirements of laying hens from 60 weeks of age until depletion.
- Feed is highly palatable to encourage feed intake and egg production.
- Optimised egg size.
- Optimised production and profitability.

Composition		
Nutrient	Specification ^{1,2}	Min/Max
Protein	130	Min
Lysine	5	Min
Fat	25	Min
Fibre	70	Max
Calcium	30 - 40	Min to Max
Phosphorous	3	Min

TEXTURE AND PACKAGING:
Texture: Mash
Packaging: 10kg and 40kg bags

Animal Group:

Layers

Class:

Complete Laying Feed

Objective:

Optilay 60 is developed to meet the nutritional requirements of laying hens from 60 weeks until depletion.

Feeding Instructions:

1. Feed *ad libitum* from 60 weeks of age until depletion.
2. Predicted feed intake of 115-125g/hen/day can be expected.
3. Fresh feed and water must be available at all times.

General:

- This ration is developed to optimise eggs size, production and thus profitability.
- Contains at least 5% genetically modified organisms.

¹ Reflects minimum and maximum values for registration purposes. Actual nutrient values might be higher than minimum specifications and lower than the maximum specifications.

² Unit g/kg
