High quality supplement for growth and finishing of cattle

- Feed for cattle fattening.
- Provides optimal quantities of quality natural protein, NPN, minerals, trace minerals and energy for maximum performance.
- Supplies sufficient levels of rumen bypass protein and energy for improved ADG.
- Recommended for feedlot cattle.

FEEDING INSTRUCTIONS

1. Protect this farm feed against rain. NPN is soluble and animals drinking such a solution could be poisoned.
2. Do not feed this farm feed indiscriminately with other NPN containing farm feeds. Consult an AFGRI Animal Feeds Technical Advisor for recommendations.
3. Vinegar is an effective remedy against NPN poisoning. Treatment: Mix with an equal amount of water and dose half a bottle per calf or large sheep and 2 to 4 bottles per head of cattle (1 bottle = 750ml).
4. Gradually adapt animals over 14 days to Fintech 12 in order to avoid acidosis.
5. Animals must have free access to the Fintech 12.
6. Ensure that sufficient trough space is available.
7. Ensure that sufficient grazing or roughage is available.
8. Guidelines for intake: Intake will depend on the production status of the animals and the quality and quantity of grazing/roughage available.
