FEEDING INSTRUCTIONS

1. Protect the feed from rain. NPN (e.g. urea) is soluble and animals drinking such a solution could be poisoned.
2. This farm feed must not be fed indiscriminately together with other NPN-containing feeds. Consult an AFGRI Animal Feeds Technical Advisor for recommendations.
3. Vinegar is an effective remedy against NPN poisoning. Treatment: Mix with an equal amount of water and dose half a bottle per calf or large sheep and 2 to 4 bottles per head of cattle (1 bottle = 750ml).
4. Gradually adapt animals over 7 days to the Complete D-Tech in order to avoid acidosis.
5. Animals must have free access to the Complete D-Tech.
6. Ensure that sufficient trough space is available.
7. Guidelines for intake: Intake will depend on the production status of the animals and the quality and quantity of grazing/roughage available.

WARNING
